YUANMIND

The Overthinking *Detox*

Stop mental spirals in 10 minutes.
A system to break the loop, decide fast, and move forward.

BREAK THE LOOP → START NOW

Your Brain Is Not the Problem

You make 35,000 decisions every day.

No wonder you're exhausted before noon.

But here's what nobody tells you:

> *Overthinking is not a personality flaw. It's a signal.*

Your mind is trying to protect you — from mistakes, from regret, from the unknown.

The problem? **Protection mode became your default mode.**

This guide will show you how to stop it — **today.** Not with willpower. With a system.

The 3 Types of Overthinking Traps

Trap 1: The Replay Loop

You keep replaying past decisions. "What if I chose differently?"

→ This drains energy on things you cannot change.

Trap 2: The Analysis Spiral

You research, compare, weigh options — but never choose.

→ More information doesn't create clarity. It creates confusion.

Trap 3: The Future Panic

You imagine worst-case scenarios that haven't happened.

→ You're solving problems that don't exist yet.

> *Which trap do you fall into most? Circle it. That's your starting point.*

The Wu Wei Principle

WHY EASTERN PHILOSOPHY WORKS HERE

Ancient Chinese philosophers discovered something 2,500 years ago:

> *The best decisions feel effortless. Not because they're easy — but because you stopped fighting yourself.*

This is called **Wu Wei (无为)** — "effortless action."

It doesn't mean "do nothing." It means:

Stop forcing. Start flowing.

When you overthink, you're forcing your brain to find the "perfect" answer.

Wu Wei says: **there is no perfect answer. There is only the next step.**

The 7-Day Detox System

1 The Decision Audit

Write down every decision you made today. All of them. Now circle the ones that actually matter (hint: it's less than 5).

💡 **Insight:** 90% of your decisions don't deserve your energy.

⚡ Open your notes app and list every decision from the last 3 hours.

2 The 2-Minute Rule

For any decision that takes less than 2 minutes to reverse: decide NOW. Set a timer. When it rings, choose. No exceptions.

💡 **Insight:** Speed beats perfection for reversible decisions.

⚡ Pick one small decision you've been putting off — and decide in 2 minutes.

3 The "Good Enough" Practice

Pick one decision today and intentionally choose the "good enough" option. Not the best. Not the optimal. Just good enough.

💡 **Insight:** "Good enough" done today > "perfect" done never.

⚡ The next time you're choosing between options, pick the first one that's 70% right.

4 The Input Fast

No articles. No podcasts. No advice. For 24 hours. Your brain has enough information. It needs silence to process.

💡 **Insight:** More information ≠ better decisions.

⚡ Unfollow 3 accounts that make you overthink. Right now.

5 The Body Check

Before your next decision, close your eyes for 60 seconds. Ask: "What does my gut say?" Write it down. Then decide.

💡 **Insight:** Your body often knows the answer before your mind does.

⚡ Close your eyes. Think of a decision you're stuck on. What does your gut say? Write it down.

6 The Regret Reframe

Write down a past decision you regret. Now list 3 things that happened BECAUSE of that decision — things that wouldn't have happened otherwise.

💡 **Insight:** Every "wrong" decision created something right.

⚡ Write down your biggest regret. Now find 3 good things that came from it.

7 The Next Step Protocol

Stop asking: "What's the best choice?" Start asking: "What's the smallest next step?"

💡 **Insight:** Clarity comes from action, not from thinking.

⚡ What's the ONE thing you've been overthinking? Write down the smallest possible next step. Do it.

The 60-Second Reset

Use This When You're Stuck

1. Name the trap (Replay / Analysis / Future Panic)
2. Ask: "Is this decision reversible?" (90% are)
3. Set a 2-minute timer
4. Choose. Move. Don't look back.

PRINT THIS PAGE. TAPE IT TO YOUR MONITOR. USE IT EVERY TIME.

Reduce → Align → Act

THE CORE FRAMEWORK

This is the system behind everything in this guide. Memorize it. Use it daily.

R

Reduce

Cut the noise. Fewer inputs, fewer options, fewer criteria. When in doubt, remove — don't add.

A

Align

Check with your gut, not just your head. If it doesn't feel right, it isn't — no matter how logical it looks.

A

Act

Take the smallest next step. Now. Don't wait for certainty — certainty comes after action, not before.

> *10 minutes. That's all it takes. Reduce the noise. Align with your gut. Act on the smallest step. Done.*

You Did It.

- ✓ 90% of decisions don't deserve your energy
- ✓ Speed beats perfection for reversible decisions
- ✓ Your body knows the answer before your mind
- ✓ Clarity comes from action, not from thinking
